

CTVM as a Service

Providing essential security capabilities to organizations as a flexible subscription model

The RAVENii Continuous Threat & Vulnerability Management (CTVM) as a Service offering helps organizations defend against increasingly complex cyber attacks with continuous threat monitoring and management.

The service identifies, analyzes, and remediates vulnerabilities and threats in real-time, keeping your network running and corporate assets safe. With RAVENii "Security as a Service" solutions, you can protect your intellectual property, customer data, and reputation. You can also devote more IT resources to your core business.

Companies face attacks daily from competitors, criminals, and nation-state entities who exploit all possible vulnerabilities to compromise networks and access sensitive data. The real-time measurement and monitoring of vulnerabilities and the threats is essential to stopping these complex attacks.

RAVENii's unique service model provides comprehensive protection for your company using a subscription model that blends our expertise and platform capabilities with your organization's strengths, lowering operational costs.

CTVM as a Service includes;

- Regular executive indicator and reporting debriefs
- Vulnerability prioritization and remediation plans
- Real-time attack surface measuring
- Real-time on-the-wire passive vulnerability assessment and threat monitoring
- Real-time indicator of compromise alerting
- Regular active vulnerability assessments
- Log collection from Windows, routers & switches, firewalls, Linux and Applications
- Log archival
- Forensics
- Access to RAVENii's Security Incident Response and Management Team

Benefits

Enhance your program by building to suit instead of overlapping investments or employees

Increase visibility into security effectiveness and costs with powerful metrics

Deploy effective solutions in days

Lower operational costs by using RAVENii experts only when you need them

Eliminate administrative maintenance and upgrade activities

Reduce license and maintenance costs

CTVM as a Service

Providing essential security capabilities to organizations as a flexible subscription model

Comprehensive, Subscription-based Services

You can define the areas where you want support and retain as much control over your security as your business requires. Overall, RAVENii "Security as a Service" solutions give you access to a comprehensive, proactive approach to managing, monitoring, and protecting your business. A dynamic subscription model and unique three tier system, blends RAVENii security engineers using industry-leading tools and processes with organization's staff and processes. Our advanced platform of automated threat & vulnerability monitoring and mitigation capabilities works 24x7x365 to protect your network against emerging threats.

Levels of Service:

TIER 1

Security Infrastructure as a Service (SIaaS) includes a turnkey Threat & Vulnerability management platform for organization's in-house expertise without the distractions of platform maintenance, upgrades and licensing overhead. It includes maintenance, licenses and subscriptions.

TIER 2

Cyber Security as a Service (CSaaS) includes Tier 1 plus notification of threat events, vulnerability assessment configuration and administration, monthly debriefs on threats, vulnerability prioritization and tracking and access to incident management from our global security operations centers.

TIER 3

Incident Management as a Service (IMaaS) includes Tier 2 plus day-to-day monitoring and management activities to remediate incidents, perform root cause analysis as needed to resolve issues, and execute standard changes. The service also includes full integration into the RAVENii 7-stage security incident response process to serve as an incident operations and reporting process.

All three Tiers provide you with the broad and deep expertise of RAVENii, allowing you to request services as you need them.
